

AZIZ JUZAR SHAHIWALA

SUMMARY

Third year iMScIT student at GLS University, Ahmedabad, with hands-on experience building full stack web applications using Python, Flask, and React. Developed and deployed WorkforceHub, an HR attendance management system with AI recruitment integration. Adept at working across the full stack, from REST API design to frontend implementation. Seeking a full stack or backend developer role where I can apply practical skills and continue growing.

PROJECTS

WorkforceHub

2024 – Present

Full Stack Web Application | React, Flask, SQLite

Deployed: Vercel + PythonAnywhere

- Built a multi-module HR and attendance management system with role-based access control for admin, manager, and employee roles.
- Integrated FullCalendar with a public holiday API to render live attendance records and schedule visualisation.
- Developed an AI-powered recruitment module using the Claude API to screen and recommend candidates.
- Deployed frontend on Vercel and REST API backend on PythonAnywhere; system handles real-time data across both platforms.
- Completed Online Internship from MSP Concepts. Link: <https://www.mspconcepts.com/>

DataShare Entry System

2024

Web Application | Python, Flask, SQLite, CSV

Deployed: PythonAnywhere

- Designed and built an internal CRUD data entry tool with two-tier guest and staff access control.
- Implemented CSV export functionality enabling bulk data download for reporting.
- Deployed on PythonAnywhere as a live web application accessible via browser.

StringRotator

2024

CLI Tool | Python

- Built a terminal-based 3D ASCII art renderer that applies matrix transformations to animate rotating text, with the help of AI
- Packaged and distributed as a downloadable CLI application.

EDUCATION

GLS University — Faculty of Computer Applications and Information Technology

2023 – 2026

iMScIT — Integrated Master of Science in Information Technology

CGPA: 8.0 (estimated)

- Relevant coursework: Python, Machine Learning, Java, Web Development, Information Security, Database Management, OOP.

SKILLS

Languages: Python (Intermediate) | JavaScript (Beginner) | Java (Beginner) | SQL (Beginner) | PHP (Explored)

Frameworks & Libraries: Flask (Intermediate) | React (Beginner) | Scikit-learn (Explored) |

Tools & Platforms: Git & GitHub (Beginner) | VS Code | PythonAnywhere | SQLite | Vercel

Concepts: OOP | REST APIs | Machine Learning | Information Security

Soft Skills: Team Collaboration | Formal Communication | Self-directed Learning | Problem Solving

CERTIFICATES & ACHIEVEMENTS

Java Brain Digger — Winner	2025
-----------------------------------	------

GLS FCAIT CyberShadez | Certificate + Trophy

Python for Data Science	2025
--------------------------------	------

Coursera | Completion Certificate

Microsoft Power BI	2025
---------------------------	------

Microsoft / Koeng | Completion Certificate

Hackout 2025 — Participant	2025
-----------------------------------	------

DA-IICT Hackathon | Participation Certificate

IT Treasure Hunt — Participant	2026
---------------------------------------	------

GLS FCAIT CyberShadez | Participation Certificate
